

Creation, Management and Control of Inequality - Profit for The Representatives of Lord Prof. Momtchil Dobrev “Financially banking resource-based technological mafia-driven materialism” for robbery of people, nations, whole countries, criticism of Prof. Stiglitz

Lord Prof. Prof. Momtchil Dobrev-Halachev, Lady Prof. Mariola Garibova,
Mariika Dobreva, Rumens Rumjantzev

Scientific Research Institute Dobrev & Halachev JSC.

Abstract This PhD Prof. Momtchil Dobrev-Halachev developed the 2008 Theory of Generation of Crises, Theory and Practice of Mafiotism and 2001 Theory of the Mafia. Based on these two theories this paper explains the principles of creating, managing, controlling, enhancing inequality in a society.

Keywords — Mafia, Crisis, mafia, corruption, theory, finance..

I. INTRODUCTION

In the year 2001 Lord Prof. Momtchil DObrev developed the "theory of the mafia" and "Theory of corruption". All the two theories he developed by analyzing the mafia and corruption all over the world. In Bulgaria, Germany, European Union, and other countries.

In the year 2008 Lord Prof. Momtchil Dobrev developed the "Theory of Generating Crises". The theory of generating crises has been developed by analyzing all the relationships between countries, and lysing the causes and consequences of crises. The theory examines all possible options for generating crises.

In the year 2010 Lord Prof. Momtchil Dobrev developed the "Theory of Mafiotism" as a new state level based on the private and personal interests of prime minister, ministers, government. This theory was developed based on the analysis of the reasons of the First World War 1914-1918, Second World War 1941-1945, French Revolution 1789, Russian October Revolution 1917, Cromuel Revolution, The Coll War, all the wars during the 17th, 18, 19 centirues, the war in the 20th century, Iraq War, etc.

Lord Prof. Momtchil Dobrev has developed the "real-world materialism as a critique of Karl Marx's" Historical Materialim "The financial banking resource-based technological mafia-driven MATERIALISM".

Lord Prof. Momchil Dobrev developed on the basis of these his theories the essence of the processes managed by the representatives of this materialism and the methods, ways of creating, controlling, managing inequalities in a society, state, states.

A. Introducing the Problem

The problem of the emerging new kind of capitalism - named by Prof. Dr. Momchil Dobrev MAFIOTISMUS is enormous because it concerns not only the rule of one state but also the governance of a union of states and a way of managing the world.

Disclosure of the principles of mafiotismus and the principles, methods, the work of the representatives of the financial bank resource technological malformed materialism in the creation, control, management, strengthening of the inequalities in a society, in an alliance, in continents, in the whole planet are important for the whole our civilization.

1.2. The importance of uncovering the principles, dependencies, models of creation, management, control of inequality between citizens, between states, between continents is of importance to the modern economy and to solving the problems of economies at the present stage of the world economic development.

1.3. Thesis of Lord Prof. Dr. Momchil Dobrev is that Mafiotismus and the representatives of the Financial Bank Resource Technological Mafia-driven Materialism manage through affections and control and create inequalities in one society, one nation, one state, different states, unions.

II. RESEARCH METHODS

Research methods of occurrence of MAFIOTISMUS and the inequalities, its logic of work, of existence, of management are the following:

- Analysis of the laws of one country.
- Analysis of all authorities in one country - judicial, legislative, executive
- Analysis of the implementation of the laws of a country
- Analysis of management of public affairs
- Analysis of the existence and / or presence of the civil society.
- Analysis of the work of the Prosecutor's Office as a guarantor of the existence and development of mobbing.
- Analysis of the social directions of development of a society
- Analysis of the judiciary, judges, judges, judges, prosecutors, investigators, judges, disciplinary and other liability.
- Contract for European Union
- Alays on the laws and contracts of the European Union
- Complain to the European Union
- Complain to the European Commission

III. PRINCIPLES OF MANAGEMENT OF INEQUALITIES BY REPRESENTATIVES OF FINANCIAL BANK RESEARCH TECHNOLOGY MAFIOTISED MATERIALISM.

Create and manage inequality by:

- Through trade wafers
- By sanctions
- Via international financial institutions - the International Monetary Fund, the World Bank
- By laws - taxes, insurance, regulations, benefits, pensions
- Through the pension system
- Through education
- With health care - hospitals, health insurance, hospital and non-hospital care, creating corrupt practices in hospitals, clinics, doctors' guilds, no treatment, no access to treatment, non-access to medicines
- Via pharmacies - creating drugs that cause addiction, morbidity,
- through the banking system
- through the financial system

- by generating crises - currency, economic, government,
- through the economy
- through the media
- through psychoses, psychiatry
- through business for the poor
- by increasing property rentals in whole cities, entire countries
- through lawlessness in the judiciary
- through lack of justice, legality in the judiciary
- by manipulating the judiciary
- through the mafiotization of the administrations - state, municipal
- by manipulating the executive power - ministerial council, ministries,
- by manipulating controlling and verifying institutions
- by manipulating laws
- through business for the rich and the richest
- by creating a debt system
- through greater poverty
- by reducing the rent - income from rents, equity investments, property and others
- Through government policies
- By imposing laws / the example of the European Commission and the European Union
- By creating corrupt practices towards state institutions - NRA, police
- By creating a mafia in all state institutions
- By creating a mafia in the judicial system - a court, a prosecution,
- Through wars
- By lacking and limiting opportunities for realization
- Through wages and the establishment of a minimum wage system of 99% of the population
- By creating a group of poverty and a group of the over-rich
- Through the tax system - tax increases
- By setting a minimum wage and its dependence on GDP and other indicators.
- By supporting foreign direct investment to cash money in the country concerned by minimizing incomes compared to developed countries
- By providing an average of such income that provides minimal human existence without creating other opportunities for realization
- By manipulating government, economic union, states
- By generating crises - economic, financial, currency, demographic, cultural and other.
- By generating refugee crises
- Through crises in social systems
- By manipulating the judiciary
- By imposing corrupt practices in the state, local government, laws, public procurement,
-

The only goal is the profit and enslavement of peoples, states, governments, creation of monopolies.

Participating countries - banks, financial institutions, companies - oil, resource, steel, oil, food, medicine, fuel.

Finance and money determine politics, wars, peace.

Primary goal and approach: Formation of central banks in the bigger states that actually control not only finance, but also economic activity and politics. These central banks will be controlled by governments, states, parties, citizens, a whole territory, in terms of money, investment, resources, use, in whose favor and for what.

These are the initial steps. Establishment of central banks in the major countries in fact to control not only finance but also economic activity.

Establishment of central banks in countries owned by private individuals and private banks. This controls the economies of these countries, governments of these countries, citizens, over entire societies.

Where not allow the creation of private central banks in the countries - generate occasions to cause civil wars, wars between countries, causing "revolutions" - financing by the banking and financial resources technological capital.

Creating conditions for the destabilization of the country, import of corruption, causing a civil war, causing war, creation of conditions for maturation of the economic crisis which lead to the destabilization of the political power in the country.

Goals:

Controlling 99.9% of the population by governments - not only through finances, but also by raising faithful government and state subjects - from universities, world institutions, clubs, lodges, foundations, which then either become presidents, prime ministers, ministers, heads and important departments.

Gathering 99.9% of the population

Giving up 99.9% of income, savings - through high taxes, interest rates, rising food prices, higher service prices, increased consumer prices, increased interest rates on credit cards, fast credit,

Control of security services and command of compromise.

Control of whole countries

Through debt papers control of governments, states.

Money control, their circulation, movement, direction, direction.

Policy control and policies

Press control

Policy control

Control of the Masonic lodges

Purpose and purpose of war, military conflict, aggression - profit.

Control and prevention of technology deployment.

Controlling and preventing the production of free energy technologies to be enjoyed by all people and peoples.

Control of patents that contribute to the development of civilization, not to see the world, to be forgotten, not to be used.

Control and liquidation of scientists who have created innovative solutions for the benefit of humanity in science, technology, and treatment.

Control and prevention of development of treatments for the treatment of lethal diseases.

Import and export of corruption in one country to destabilize it creates inequality in society.

Import of terrorism that creates fear, instability and inequality.

Export and import of mafia principles in one country.

Creating a debt economy, 99% debt spiraling, money control, money transfer controls, cash payments, credit control, money-controlling states, societies, peoples, governments.

Command of the masses, peoples, persons through racketeering, coercion, orders, use of state and other institutions for racketeering, coercion, extortion, use of police prosecution for racketeering, coercion extortion. .

Personality control, with debit, credit cards, mobile phones, mobile applications - uninterrupted control.

Controlling civil society through foundations - NGOs for the purpose of replacing public opinion, funding them for control and management of society.

Owning not all resources of land, oil, gold, silver, uranium and income from them.

Managing the population through illness.

Managing the population through pollution of the environment

Technology management, when technology is being introduced into a conversion, why not, keep another, disappear.

Private storage of tremendous wealth.

Generation of crises - any, economic, currency, social, refugee, conflict, war political crises . The financial crisis occurs the fastest, the currency crisis occurs instantly, followed by economic crises, Part of the financial crisis and one kind of it is the currency crisis. There is a financial crisis. There are always economic crises.

World currency controlled by members of the Financial Bank Resource Technological Mafia Fit Materialism.

Creating a spiral of debt, the obligations of individuals, families, communities,

Crisis generation schemes to increase inequality in a nation, nation, community, unions, peoples:

- Involvement of wars - they lead to deep inequalities. Prevention of military conflicts

- Involvement of military intervention in a foreign state, the darkness creates chaos and inequality.

- Import and export of corruption, mafia in all institutions in one country,

-Tracking money out of circulation, it immediately creates economic crises. In turn, they cause huge damage to whole countries. Accordingly, he gets loans.

- The challenge of a refugee crisis - causes - creates economic, social, demographic, social, political crises.

- The Challenge of the Financial Crisis

- The Challenge of the Currency Crisis

- The Challenge of Economic Crises

- The challenge of a political crisis - not always last

- Increase deficit - for subordination

- World wars become redundant due to the danger of nuclear exchange, so terrorism, Islamization, will be used.

- Managing the population through fears that create stress. Planting fear among the population.

- Creating antipodes - through fear, manipulation,

- Creating an intrigue machine

- Creating a machine for seeming occasions - for wars, conflicts, aggressions, diversions,

-Induction of inflation and deflation afterwards

-Creating antipodes - with the ultimate goal of the Cold War battle - generates enormous profits, huge cash flows,

- Knowledge of resources, resource control

IV. CREATION AND MANAGEMENT OF INEQUALITIES

CREATION OF GENDER PRODUCTS - FURTHER POVERTY - FAST CREDITS FAST LOANS WITHOUT SECURITY, WORK-FREE AGREEMENTS, QUICK LOANS WITH HIGH INTEREST - EXTRAORDINARY INTEREST,

All this will cause stress, fear and insecurity in the global poor. The vent will be gambling, alcohol, drugs - bigger profits, greater dependence.

These industries will make huge profits.

There will be grocery stores with cheap goods, secondhand and second-hand goods

On the other hand, the state supports this laughter by increasing taxes, increasing uncertainty in justice, gaining justice,

Creating laws through which taxpayers and their administration set their own tax levels, tax rates - profit tax, real estate tax, municipal waste tax, dropping the opportunity to appeal immeasurably to huge tax assessments - determined in an unlawful way and way from the ruling.

The Mafia will manage the administrative courts - there will be no real opportunity to get justice.

The aim will be to reduce the middle class, to be diminished, to be destroyed, to be bled, to have no strength to develop, to resist crises and to create competitive products, services,

Real investment opportunities for the middle class will disappear, reducing purchasing power.

As a final result, the middle class will move to the global poor.

Both the global poor and the middle class will enter the spiral of poverty - the centrifuge - the vortex of destruction and slavery. And the debt spiral.

The real middle class will evaporate.

The system of idleness will be covered by fast loans at huge interest rates - with exponentially high interest rates.

Only two types of businesses are developing - a business for the vast wealthy and business for the global poor.

Only for these two layers.

Global inequality as a business opportunity to deepen and grow.

Money from the division of society

Enhancing this inequality

Creating unique profit opportunities.

Global strategies for development, increasing, deepening inequality

The shifting of money, goods, services, prices in the global economy,

Plutonomy - the rich become richer, it is about 0.1% of the rich

Oil companies, steel, construction, hedge funds, food industry, chemical multi-companies, supermarkets, airplane builders, pharmaceutical companies, car manufacturers, internet providers.

Greater polarization and increased inequality. Neighborhood between countries is increasing. The inequality in each of the countries will increase tremendously.

V. TYPES OF BUSINESS FOR MANAGING AND INCREASING INEQUALITY

On top are the super rich - who buy a car bentley, and the Lear aircraft.

Global poor people create products and services for selling products for poverty - Quick Loans

- Contracts without fixed working hours

- Quick loans

- Loans at huge interest rates

- They are followed by a reaction - stress, tension - which leads to an increase in the business of alcohol, drugs, gambling - hence the collapse of individuals, peoples, communities

- Stores for cheap goods

- As a result, pressure on the middle class, which at some point will be forced to disappear.

- The middle class will move to the poor class

- Vacations, a new car and more - and that's all on credit.

- Both countries - expensive cars and services, properties,

Prekariat" - the poor 99, 9% of the population - mischief manages passions, nerves, behavior.

Focus the business of these mega-companies on the two layers: super-rich and super-poor.

Generating crises that will lead to a stronger and overall impoverishment of the middle class, with the poor class being multiplied.

The institutions that create the division of the layers, the management of this division, both for whole countries and in the countries themselves, increase this division, strengthen the division. The IMF, the World Bank

The process is the transfer of wealth from the poorest to the richest.

Fundamental Rights - Damaged Rights,

Therapies and services

Justice.

Mafia - reinforces inequality through corruption

Mafia strengthens inequalities through mafia-driven behavior, management.

Growing cost bubble

They work with a wage of poverty - insecurity.

The poor die 10 years before the rich.

Social cleansing

Social cleansing and Islamization.

Working on 12-hour shifts with a contract without working time.

Their lives go on a journey - at least 90 minutes from their home.

Separation of cities, districts.

Create two types of cities and neighborhoods.

Both layers are actually avoided, do not cooperate, do not communicate, do not communicate with each other.

There is a division in the cultural, emotional, communication sphere, not only in the social sphere.

Demolition of social contacts, social networks, poor people reduce food and heating to survive in order to be able to pay their rents.

Now 41% of the German's income goes to rent the house, whereas 3-4 years ago this cost was 25% of the income of the Germans.

There is a steady increase in costs.

Long-term inequality is increasing.

Debt as a means of increasing division.

VI. MANAGEMENT OF INEQUALITIES BY CREATING THE DEBT SPIRAL AND ITS MANAGEMENT AND CONTROL

Through debt can be controlled, it controls the division.

Reduce mortgage funds, systems to support small and medium businesses, support their businesses.

Quantification facilities go to the rich companies.

Public procurement is managed only by the rich, poor and medium-sized firms are pushed out of competitions, auctions, public procurement.

Public contracts are made for well-defined enormous companies so that they only meet the conditions and requirements for participating in the respective auction, competition or public procurement.

Banks finance and support only the wealthy companies.

European funding goes to the rich companies.

Fast credit companies.

The debt industry is part of the means of creating, managing, controlling the division of society.

The financial industry is a vehicle for this debt industry. .

The financial industry with the provision of fast loans with high and huge interest rates.

The emergence of fast-paced companies where money laundering, uncontrolled money laundering is only rich.

Rich people invest in products, industries, business services for the poor.

They practically deepen and accelerate divide and inequality.

Extended credits for the purchase of cars, furniture, holidays, properties,

Bridge credit quick credits to cover heating and food bills

Debt - its increase practically accelerates inequality and division into society.

93% of the ownership in Bulgaria is private. By dividing and increasing inequality - virtually because of poverty, this property is reduced as people have to sell their property to survive to bind the two ends,

Continuous increase in taxes, food prices, services, utilities.

Trading in debt, increasing debt, financial institutions trade in our debts.

Quantitative facilities in the US 2008 actually go to the financial institutions instead of going to citizens.

Instead of spending money on services, appliances, holidays, refrigerators, TVs, cars. Instead, these quantitative facilities have increased and increased inequality and division.

The plan was more debt,

Money throwing in crisis really creates greater inequality and the division of society.

Calculation of poverty - falling into debt - increasing debt -

All measures taken by government policies aimed at and guaranteeing the increase of debt in people.

Household debt in the UK is now about £ 395 billion.

VII. CREATION OF INEQUALITIES BETWEEN STATES through the instruments of the International Monetary Fund and the World Bank

The policies of the IMF and the World Bank - the indebtedness of entire nations, nations, in order to long increase the division of inequality, buying - privatization of state-owned enterprises, funds, resources, entire economic branches,

Inequalities between countries.

Crisis-building, and at the same time offering the IMF and the World Bank to help countries emerge from these crises.

Creating the crises in Latin America.

The IMF offers aid to resolve these crises. The IMF fails to cope with these crises. This is deliberately done. The ultimate goal is to create these countries' debt spirals with the IMF and the World Bank.

As a result of these impacts - deepening disproportions, accelerating the lagging behind of these countries from other countries - increasing inequalities between countries.

When do these crises occur, for example, in Latin America? When the interests of the United States are threatened in those regions that are very rich in natural resources.

Example The US is losing its lead in Bolivia after the nationalization of lead mines. Outcome - The United States is seeking an option to overthrow the government. 1952 General Barrientes won the election. Steps - The military dictatorship opens wide Bolivia's doors to foreign capital.

The IMF's stabilization strategies include the following steps:

Free exchange rate (introduction of special customs tariffs.

Freezing wages - resulting in mass unemployment.

Lack of social programs.

Bolivia has been brought to a halt.

The same happened in 1960 in Uruguay. There is an increasing deficit in the state budget. National Banks created in 1949-1959 and 88 foreign banks contributed to Uruguay's instability. 1954 Uruguay exports gold to the United States. For \$ 16.5 million. The country is plagued by misery. Difficult supply of the population with basic goods and services.

The IMF forbids Uruguay and concluding bilateral trade agreements with foreign countries that it can not control. Such bilateral treaties, however, lead to increased commodity exchange and stabilization of economies, export of goods, resources.

The IMF will take over all Uruguay's commercial and financial operations. The MFA also puts the National Bank of Montevideo in check.

1968 The IMF has urged the National Bank of Uruguay to reduce its loans to the public sector and to increase foreign loans. , which makes them

dependent on foreign credits. As a result, inflation has jumped tenfold over the period 1966-1972. Exit \$ 350 billion out of the country. Uruguay's foreign debt increased from 5.3 billion pounds in 1967. to 14.7 billion pesos in 1970. There is speculation and the black bazaar. Crime and inequality are increasing.

1956 is provoking the crisis in Argentina. The agreement with the International Monetary Fund (IMF) reduces currency reserves, foreign trade, prices are increasing, the balance of payments is undermined, the State is obliged to provide full information to the IMF, which information is relevant to national security and national defense. The state allows the entry of foreign capital. The aid received by the fund is much smaller than the promised. For the period 1958 to 1970 the Argentine peso was 13 devaluated. The level of living is sharply declining, the population is massively impoverished, it increases the state regulation.

In the late 1950s Brazil reached hyperinflation, based on the low purchase prices of coffee. , wages fall 4 times, Real national resources are acquired by foreign companies.

Brazil is seeking the assistance of the IMF. The measures are: - reduction of the wage quota for the budget sector workers from 37% to 27%. , 300,000 staff from state-owned enterprises have been cut. this is 20%. The gap between rich and poor is deepening. The total poverty of the population is increasing.

1968 Peru agreed with the IMF to create 450 foreign companies. These companies are from Japan, the US, and the US Debt to foreign countries is rising enormously, In 1968, party is insolvent. In 1970, in Peru, the representatives of foreign firms who violated the laws of the state were sued. There is a partial nationalization. In 1972, government investment is 39%, in 1973 - 42%, in 1974 - 43%.

There is a strong link between strong economic groups and foreign capital, which leads to economic de-stabilization. This applies to Brazil, Argentina, Chile ..

The IMF aims to liberalize foreign capital, no stabilization of the national market. The goal is to penetrate foreign companies into countries exporting resources, goods, national wealth, without engaging in the development of local economy, markets, consumption. Inequality grows drastically, dissatisfaction grows into strikes and riots, poverty rises.

In Jamaica, after the nationalization of the bauxite industry, which is the main source of revenue for the national budget, economic growth is declining, government debt has increased from 1973 to 1980 from \$ 501 million to \$ 1,595 billion in 1992. and in 1992. is now \$ 2 billion. Jamaica is looking for help from the IMF, which promises \$ 240 million over a three-year period, returns to the proceeds of the proceeds instead of returning to the hands of foreign investors and related strata. Real over 300 million dollars are flowing. As a result, consumer goods

prices are rising, poverty is rising, oil, electricity and water prices are rising. , unemployment is rising dramatically, the IMF is not really interested in any social activities, a new contract with the IMF - leads to freezing of salaries, creating favorable conditions for entering foreign capital, limiting the use of currency, 1982. Jamaica's unemployment rate reaches 26%. The militarization of the country began with the help of the United States in 1982. Jamaica became the first US assistant to aggression in Grenada.

Regulating the economies of Latin American countries through the IMF accelerates and increases their indecision.

In the IMF system, it creates speculation and crime.

Devaluation of the national currency, increase of debts, accelerated inflation, reduction of stability, creation of chaos, creation of continuous conflict, export of capital, absorption and acquisition of the resources of the states of inexact, Only in 1988 are exported capital in the amount to \$ 420 billion from the Latin American countries.

The IMF does not change its strategy and approach even after the increase in liabilities, which actually leads to the impossibility of repaying the financial obligations, decreases the investment, which in turn increases instability and accelerates the debt spiral.

The main instrument the IMF advises on regulating the deficit - is the devaluation of the currency, which in turn accelerates the debt spiral.

This is proved for Brazil in 1986, in Mexico for 1986, Argentina - 1986-1988.

It also leads to a reduction in production. For Chile, this is 15: for the period 1974-1975, for Venezuela it is 8% for 1989, for Peru - it is 6% for 1990.

The devaluation leads to an enormous increase in inflation, which leads to an acceleration of the debt spiral.

All this leads to hyperinflation.

For Argentina, inflation reaches 4000% in 80 years. 40% of the population is plummeting sharply and quickly.

The other instrument by which the IMF is ruining the countries is privatization. The purpose of the IMF and FBTTM representatives is Materialism is the purchase of the main sectoral businesses of the priceless of the nearby living rooms.

This is all involved in so-called shock therapy.

Banking reforms that target and prepare MFIs have the ultimate goal of privatizing banks and, hence, assets, companies - major industries, foreign trade companies, major resource-producing enterprises, commodities,

VIII. DESTRUCTION OF THE AVERAGE SALARY CLASS AS A FORM AND INSTRUMENT TO INCREASE THE INEQUALITIES

In the 50s - 60s is the middle class - the middle class increases consumption and investment in mass consumption.

Over the last 20 years, the middle class has shrunk -

In 1945 - 1978 the wealth of society was distributed more evenly.

The middle class had opportunities and means to own real estate.

Millions of people acquire real estate

Most have had the opportunity to buy their own home for the first time.

Back in Bulgaria.

After 1996 the trend turns.

There is a stagnation of wages, and an increase in costs and living costs.

At present, 41% of the average income of the Germans goes to rent the used dwelling.

Five years ago, these costs were 25% of the average income.

Real estate prices are rising faster than income.

The riches of the richest grow much faster than average wealth and much faster than the size of the economy.

Rent is a norm for a home A family that pays the rent for one life is poorer with £ 561,000 from a family it buys.

Real estate is growing faster than income increases. Costs grow faster than incomes.

Separately, the rent grows faster than the monthly installment to cover the mortgage of the purchased dwelling.

Practical wealth begins to melt and decline faster than income increases.

By 1968, the French had almost overthrown President de Gaulle

BANKS create inequality in the consumption of mortgages

Norms morale fall inequality is increasing

Disparities in opportunities - inequality of opportunities for manifestation - talent and others.

There is no equality of opportunity.

Alter Laffer sink of wealth -

The economy of percolation is as old as civilization. Previously, it was called Divine Law.

Reagan-Tachyrism - Makes wealthy people richer, everyone will be richer.

Investments reduce economic decline, it does not happen that if you give more money to the rich, it will create jobs.

**IX. INCREASE INEQUALITIES BY
MAFIOTIZATION OF THE JUDICIAL
SYSTEM, STATE APPARATUS**

By manipulating and introducing corrupt practices among judges, prosecutors, investigators, civil servants, ministries, municipal services, mayoralities, citizens are guaranteed:

- Loss of rights
- Loss of justice
- Loss of legality.

Mafiotismus as a form of government, creation, control of inequalities in one country, different countries.

FORMULA OF THE MAFIOTISMUS

The most simple model of mafiaism that describes the factors that affect the amount, type, and etc of the mafia is the following:

MAFIOTISMUS = PERSONAL Power / on the top of state institutions / state and etc./ + Influence + Connections / to personal, private companies + Interests / personal, corporate / + ORDER / ORDERS + Personal control of all state neveaus + of all states niveaus Mafia structure / inside or outside / + Monopoly Righths + laws / rules / practices / procedures + possibility of taking an alternative decision - obligation - responsibilities - morality / ethics other resources (including European funds and funds.

This MAFIOTISMUS takes on the basis of the "Financially-Based Material-Based Materialism-Based Materialism" developed by Lod Prof. Prof. Prof. Momtchil Dobrev - Halachev.

The whole process is assisted and accelerated by the environment for the emergence of all crises - neoliberalism and globalization.

Inequality between citizens and layers in society.

Through funding - state and other, through laws, through the import of corruption and / corrupt methods / mafia.

Through the curve of the duty of a family, a nation can count inequality, the division of the nation.

The debt curve shows the value of poverty, the development of poverty.

Poverty assessment is through debt debt analysis.

**X. MINIMUM WORKING SALARY- an
instrument of increasing inequality, the division of
society**

The Minimum Wage Instrument of Fraud of Governments That Define It As A Percentage Of Gross Domestic Product- Complete Fraud

Very often the minimum wages of governments and managers are determined by GDP. This is a scam.

The deception of the value of pensions from wages and, respectively, gross domestic product.

In India, Portugal, Italy, pensions are 90% of the salary, in Turkey - 100 % of salary, in Croatia - 129 % of salary.

In Bulgaria - the minimum pension is 40% of the minimum wage, the average pension is 33% of the average salary.

At the same time, Bulgaria sets a corporate tax of 10% for businesses and citizens. This supports the division of the population.

On average, the European Union is 71% of the salary.

Determination of the minimum wage as a dependence on Gross Domestic Product - the other fraud.

	GDP	min salary
average salary	min pension	

--- Romania		
Macedonia	5060 USD	270E
532E	206 E	
Albania		
Serbia	5294 USD	260E
520E	220E	
Greece.		
Croatia		
Bulgaria	7091 USD	230E
484E	83E	

**FRAUD FOR DETERMINING THE MINIMUM
WORK WAGE**

Minimum wage setting systems applied worldwide:

1). Nordic model - this model is applied in Denmark, Finland, Norway, Sweden and Iceland, as well as Austria and Switzerland.

This model lacks a national and universal wage that applies to workers regardless of their industry or geographic location.

The minimum wage level is set in the framework of the dialogue between employers and workers' organizations in particular sectors. The minimum wage is included in the collective agreement, which applies to a particular sector, which applies to trade union members and other workers.

In Sweden, the minimum wage is determined not only by industry, but also by age, experience and education.

This payment really corresponds to the opportunity in the individual branches and the qualities of the workers.

The collective agreement restricts the possibility of free negotiation directly between the employer and the employee. There is a strong social dialogue and a wide trade union membership with strong pro-business legislation.

2). JAPAN MODEL

Payments depend on the region (prefecture) and the particular sector. The sizes of the different minimum rates depend on the living standard and cost of living in the individual prefectures, as well as on the employers' ability.

Minimal regional levels are determined by the central government, and local authorities decide on sectoral minimums in their prefectures, as part of a dialogue between employees and employers.

This model allows maximum account to be taken of differences between regional economies and those with sectors. . It all depends on how employers and workers' organizations will agree.

3). IRELAND MODEL

Paying here is hourly.

These minimum hourly rates depend on age, experience and status / permanent, temporary employment, training, worker experience,. So younger people have lower rates.

The same applies to hiring for training or internship. There is no dependence on regional or industry reporting here.

Such a system is also applied in New Zealand.

4). Models based on macroeconomic formulas ie. depend on the dynamics of macroeconomic indicators.

XI. SCHEMES OF INEQUALITIES TROUGH SO_CALLED FOREIGN INVESTMENTS

Inequality between the incomes of the workers of the two countries - the country of the investor and the country where the investment is made.

1). Investing in green means the following

The Western company registered a company in Bulgaria under the Bulgarian legislation.

The same company under the laws of the state and as an investor or receive with preferences to buy land, state-building infrastructure, water supply and sewerage, communications, electricity supply and electricity supply, state-building of the respective electricity grid high voltage, communications to transport corridors and others.

The parent company oversees credit lines for building the corresponding buildings, equipment, equipment, and equipment purchases.

All this - equipment that is an obvious company development is accounted for in larger sums, the companies that build the buildings and the premises are made by companies close to the parent company, who account for construction, design and others at higher prices.

Some of these larger amounts are returned to the parent company.

Real for credit lines of 100 units, the real value of these investments is about 30-35 units. The rest are

amounts that are being washed through this whole process.

Apart from this, the company's daughter owes its debt to the parent company on the basis of credit lines and high interest rates.

Even after organizing the production, if the cost of a product is, for example, 100 units, then this finished product is exported to a parent company at 100,001 units.

Ie. real taxes are paid for 0.001 units.

The profit is actually made out.

The output is entirely 100 percent out.

Here the cost is low - wages are low and small.

And here wages are between 20 and 30-35% of the real wages in Western countries.

First option - even the parent company gets a land donation.

Second option - donation - land.

2). In construction - first scheme

Company registered. The company receives credits from foreign companies. the money of these companies do not check the origin of money laundering and others.

The credit lines are registered with the respective state institutions in Bulgaria. Buildings are constructed, which at real values cost 35% of 100 units.

And here wages are between 20 and 30-35% of the real wages in Western countries.

3). In construction - second scheme

Scheme - The company buys a property in the center of Sofia. Receives credit from a bank with foreign capital.

The real credit - the money is given by companies close to the owners of the bank, which are foreign companies.

Money is actually being poured through the bank.

All income is returned to the creditor companies through the bank.

And here wages are between 20 and 30-35% of the real wages in Western countries.

4). In construction - third scheme

Construction of company stores.

The land and the stores and chains are owned by the parent company of the parent company, which has received 100 credits.

And here wages are between 20 and 30-35% of the real wages in Western countries.

5/.Production companies. The parent company has registered a company for the purchase of the respective real estate, construction of the respective construction sites, equipment with the equipment of the parent company.

The money for all these costs is given by the parent company as credit lines - loans to the company - daughter.

Interest rates are freely negotiated. Typically, these interest rates are higher than market rates.

Loans can also be provided by a bank on the territory of the respective country, guaranteed by the parent company.

In fact, the entire investment returns to the mother company from the daughter company. The products or services produced are actually exported to the mother company at prices close to the cost of the products. I.e. no profit is realized in the country where the daughter company is registered. The profits are made by the parent company or its branches abroad.

And here wages are between 20 and 30-35% of the real wages in Western countries.

6). Banking services - financial services.

7). Real estate business

8). Outsourcing services.

9). Petroleum product manufacturer.

10). DISTRIBUTION OF INCOME to a state as a way of division, increasing the inequality in the respective state with the Western states such.

10.1 / . from Trading Circuits.

90 - 98% of the products sold are imported from abroad - given on credit with corresponding interest and penalties for delay, for the respective term. Prices are made - higher to be given on consignment. Debt is immediately

The money from the turnover of the companies is imported into the vault in the evening every night in the vault of a banking institution - mostly foreign.

The next morning the next day, the money is credited to a correspondent bank account in the bank, which correspondent bank account is such to a foreign bank from abroad.

Actually, on this correspondent bank account the shares are paid to our parent company abroad.

So no taxes are paid in the state in this case Bulgaria.

Turnovers per month of revenue draining from Bulgaria are on average between 5 and 7 billion euros, not taxable.

This is evidenced by the profits that register chains of food, consumer goods stores.

10.2). For services or mobile products or services.

The actual payment of these services if the purpose is to use a 10% profit tax in Bulgaria can be made in the country itself. However, the real situation is as follows: money paid for social services is transferred to bank accounts in branches of banks that are not controlled by the Central Bank as they are branches

10.3./ . For banking services. Money transfer, trading, This is mostly done through branches of banks that are not really controlled by the central bank and are not subject to banking supervision. These branches under all legal provisions for branches of banks whose head offices are in another country of a European country. These banks are controlled through banking supervision in the countries where they are registered, but not in the country where they have only branches.

Payments in these branches are made by mostly foreign bank account companies, which are correspondent bank accounts of parent banks or banks abroad, and the authentication of these bank accounts is already the case in the relevant correspondent bank accounts abroad.

In fact, no taxes are paid on this money.

All of these schemes are evidenced by the analysis of more than 500 manufacturing, commercial, firm, product sales chains, with a real turnover of € 400-800 million, making a profit of 1-2 million euros, which does not really correspond on

XII. THE PRINCIPAL SCHEME OF THE GEORGE SOROS WORK OF INCREASING AND MANAGEMENT OF INEQUALITIES

The goals of SOROS are as follows:

Destabilization - chaos of one country, a whole system, inside - without war

Destabilization - chaos in economic direction

Destabilizers - chaos of society

Destabilization - a chaos of civil society

Destabilization of the currency

Destabilization of the economy

Destabilization - chaos in education

Breaking the moral norms of a society

Breaking the ethical norms of a society

Crisis Management - With the ultimate goal of profit - speculative profit.

Destabilization - of a society at all levels using - ethnicity, religion

All this without WAR

Governing one country, whole countries, - in the case of the European Union, with the ultimate goal of profit -

Managing a state at all levels through its close and faithful people. Demoralizing a society. Replacement of civil society with its structures to replace the real civil society. Financing and support of media - television, newspapers, magazines, etc. Financing of political parties for the purpose of coming to power and their use.

Funding individuals who will be useful for the future - sociologists, political scientists, politicians, scientists, historians, and all kinds of people.

George Soros's Crisis Generation AS INCREASE INEQUALITIES METHOD

APPROACH:

Establish NGOs in all countries
Establish any institutes like NGOs
Creating any unions - of judges, prosecutors, investigators, scientists, sociologists, political scientists,
Creating Institutes -
Funding these NGOs
Funding of these institutes
Funding of specific individuals - politicians, political scientists, sociologists, scientists, analysts, government officials
It finances revolutions in racist countries
Funding refugee waves
It funded protest-taking regimes in Africa
Funding events to dismantle countries to seize their raw materials and resources.

According to Professor Robinson, Weizhop's program is as follows:

1. Destroy all peacekeepers.
2. Elimination of heredity
3. Removal of private ownership
4. Remove patriotism
5. Destruction of the family
6. Removal of religion
7. Creating a global governance

Actually, with his actions and results from his work, Soros proves that he is working on this program.

XIII. NEOLIBERALISM AND GLOBALIZATION as an environment for increasing inequality of poverty, division

Neoliberalism around the world leads to globalization of the world economy. There is a cyclical nature of production and crises are preserved. Crises become more and more honorable. Crises are getting harder to overcome.

Progressive technologies are developing and there is a strategic superiority of certain countries over the rest of the world.

Globalization has led to the full exploitation of small peoples by large peoples. Neoliberalism and globalization do not bring the peoples closer, but they really take them away and real slavery takes place in one country. They bring the near-developing countries closer, which makes the respective crisis immediately affecting all the other countries that are in this industrial and other development. Smaller countries are affected by lagged lag and in smaller degrees.

Countries in the world are not at the same level of development, be it industrially, both spiritually and culturally. In neoliberalism, the world and domestic markets are the main driver of economic development. Different countries have different levels of economic development. The different degree of competitiveness. Developed countries' economies produce cheaper, produce more

and more quality, and thus impose their output and thus conquer the markets of the smaller ones, not the more developed countries. This is the process of pardoning poverty.

Neoliberalism is rising in a natural way using the political system and political parties to impose a financial oligarchy. The financial oligarchy governs the governments and, respectively, the states.

In turn, intertwining financial interests and politics brings not only the financial oligarchy but also the corruption and mafia in the state at all levels.

The financial oligarchy, the big corporations also hold the government in the elite state.

Neoliberalism can not really be civilian and civilian control to control the government.

In fact, governments are creating laws that protect certain corporate interests, support their activities, enforce and legitimize corrupt practices, enforce laws that exclude real civil society, genuinely enforce laws to legalize mafia in governments, and financial mafia.

Indeed, governments are creating and adopting laws that legitimize theft, corruption, the mafia, and work in the state.

The media are conquered by certain corporations that govern governments and the state, respectively.

The media really can not fulfill their function.

Real manipulation in favor of the financial and oligarchic mafia is done by the media, which prevents other thinking, opinion, impose corruption and the mafia as a way of life, governance, organization of society.

The media are heavily dependent on oligarchs and the oligarchic mafia.

The oligarchic mafia governs governments, and thus the whole states.

This creates a division and an increase in inequality.

GLOBALIZATION and NEOLIBERALISM REALLY MANAGED THE INEQUALITIES.

XIV. Critique to the Nobel laureate Prof. Stiglitz

Inequality is not an objective law, but a subjectively managed process of the representatives of the Financial Bank Resource Technologically Mafiaized Materialism, and of Mafiosi.

The above proves this. So all the writers of the Nobel laureate, Prof. Stiglitz, that these are objective processes, do not answer the truth.

XV. CONCLUSIONS

Analysing of all the process of creating management and control of the inequalities analysing the real reasons of existing of the inequalities, the institutions and persons and policies that create, manage and control of the inequalities only by take profits from all this process should be research and shown and explain. Lord Prof.

Momtchil Dobrev gives another viewpoint for the research of all the process.
